

September 13, 2006

Dear Examiner:

In response to the Office Action regarding application #10/820392 (Brubaker) issued on 4/13/06, I have attached a replacement for the detailed description section, followed by a marked up copy, followed by a listing of claims.

The purpose of these amendments is to narrow the scope of the claims, to be more specific, and to eliminate any confusion as to the exact function of the invention.

I have also submitted a new set of enhanced illustrations, which are larger and more readily scanned. They are provided with suggested changes to the originals, and are marked in red accordingly. Please consider these for the time being, as they are offered in good faith.

Thank you,

Ken Campbell
